

AIA 2023 Specifications

360° Reality Capture Made Simple

- Quick, Straightforward DIY reality capture for small-to-medium jobsites
- Automatically communicate interior progress with interactive virtual project tours
- Easy-to-share, 360° photos are synced directly to site plans or 3D BIM models

CSI MasterFormat Number: 01 32 33 Photographic Documentation

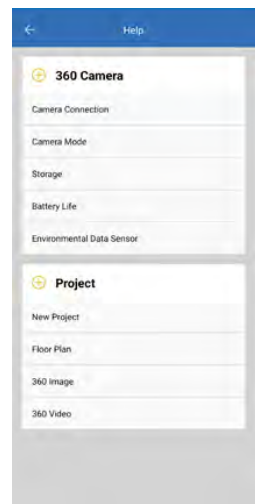

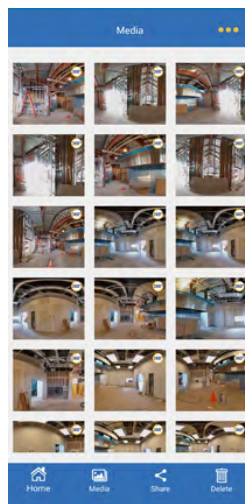

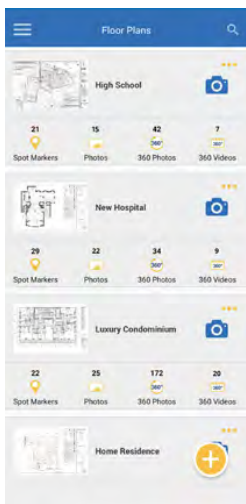

360° VR Site Tour Camera Kit

Spherical photography & 4K video

Ideal for photographing interiors

Share exactly the right amount of project detail at the right time using custom interactive PDF reports featuring the floor plan, overlaid location markers and synced 360° photos. Provide an immersive 360° site tour of your jobsite every day to make it easy to inspect each room and explore remotely.

Download the app and register as a new user. Use the default floor plan or upload one more to document progress on your construction project. Use up to 20 markers and 30 images during your free trial.

AIA 2023 Specifications

Live Streaming, Project Documentation & Time-Lapse

- Monitor, document and promote construction projects with live video
- Verify progress, respond to RFIs and view historical archives remotely
- Easily specify camera solutions for exterior/interior renovations with CSI Formatted bid specifications

CSI MasterFormat Number: 01 32 36 Video Monitoring and Documentation

ConstructionCam4K
Live streaming and 4K time-lapse

Excellent for medium/large projects

Typical construction budget of \$25K - \$500M

Specify this pan-tilt-zoom camera where ultra-wide area coverage with live streaming video and continuous video recording is required. Ideal for interior projects or as part of a multi-camera documentation package.

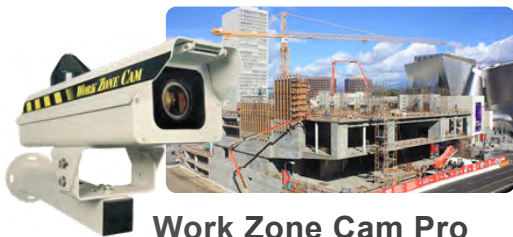

Mobile StreamCam 4K
All-in-one portable 4K video solution

Excellent for short-term, small/medium projects

Typical construction budget of \$100K - \$25M

Specify this fixed position camera for interior projects where you can view the entire jobsite from the camera mounting location, or as part of a multi-camera documentation package.

Work Zone Cam Pro
Fixed-position time-lapse camera

Excellent for short-term, small/medium projects

Typical construction budget of \$250K - \$25M

Specify this fixed position camera with flexible archiving where you can view the entire jobsite from the camera mounting location, or as part of a multi-camera documentation package.
